Black and Green Tea Extracts

Our extensive portfolio of Tea Extracts is used in a wide range of categories in the food and beverage industry. We obtain our extracts from selected Black and Green Teas. We also offer many other specialty products, such as Oolong Tea and White Tea.

Our Tea Extracts are available in soft or in dried form, soluble in cold or hot water, and in colors ranging from light to dark. Our state-of-the-art processes ensure the high quality of the recovered extracts, which we are happy to adapt to meet your individual requirements.

For detailed information concerning Tea Extracts and Decaffeinated Tea see our Plantextrakt tea-brochure.

As an additional specialty, we offer a number of variations of Decaffeinated Tea Extracts.

To accent a certain note in the flavour and aroma of your products, we also offer natural flavours from Black and Green Teas.

Decaffeinated Teas

Plantextrakt is the leading supplier worldwide of decaffeinated Black and Green Tea. Decaffeinated Teas have a high antioxidant potential that is well recognized by health-conscious individuals. People who are sensitive to caffeine prefer these teas because of their calming effect. Decaffeinated Teas are also very well suited for children.

Depending on the area of application, we offer you various product categories such as fanning type and loose tea products.

Plantextrakt uses only natural processing methods to ensure wholesome and undiluted products.

Herbal and Fruit Extracts

The following product overview will show you the true diversity of extracts, as you can select from more than 100 different plants. You can also see the latest information on our offerings on the Internet.

We would like to advise you on your specific applications with our individual product concepts. Feel free to contact us at any time.
